

# TRAPS FOR BIOLOGICAL PEST CONTROL

## 100% COMPOSTABLE

Greenvass develops the first compostable traps on the market

Keeping same properties and efficiency level as traditional model, the new compost traps avoid the environmental impact from plastics and petroleum derivative, simultaneously this new compost traps mean a saving cost in the residue managing and handling.

 **greentrapcompost**<sup>®</sup>

### USE BENEFITS:

- ✓ **Denser glue** that favour a higher insects catch and durability
- ✓ Allows a **rapid detection** as soon as the early insects appearance becomes visible.
- ✓ Intensive and **appealing colours** for a large number of species, providing a higher number of captures
- ✓ Possibility to **customize the traps** with your company logo

## greentrapcompost®

 mm	#	Material	Color	Packaging	Palletizing
