

TRAPS FOR BIOLOGICAL PEST CONTROL

Sticky traps with insect-catcher glue

Our wide range of traps, assigned for biological pest control in greenhouses, assures a high rate of captures and permits a rapid detection as soon as the early insects appearance becomes visible.

Available in different sheet widths to suit the needs of any growing space. Provided with special hook + holes for a firm fastening and easy placement.

USE BENEFITS:

- ✓ **Denser glue** that favour a higher insects catch and durability
- ✓ **Treated against UV sheet**, providing to the trap more resistance in artificial light area and in adverse weather conditions
- ✓ Intensive and **appealing colours** for a large number of species, providing a higher number of captures
- ✓ Possibility to **customize the traps** with your company logo
