

# TRAPS FOR BIOLOGICAL PEST CONTROL

## Extensible sheet roll with insect-catcher glue

The use of the adhesive roll allows rapid detection of the pest as soon as the presence of the first insects becomes visible.

Available in different sheet widths and roll lengths to suit the needs of any growing space.

### BENEFITS:

- ✓ **Denser glue** that favour a higher insects catch and durability
- ✓ **Treated against UV sheet**, providing to the trap more resistance in artificial light area and in adverse weather conditions
- ✓ Intensive and **appealing colours** for a large number of species, providing a higher number of captures
- ✓ Possibility to **customize the traps** with your company logo
