

GRAFTING CLIP SILICONE TOMATO

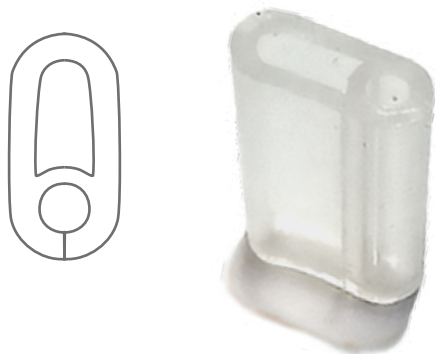

Clips designed to provide support and fix of the graft to the stem of the plant. Made of silicone of excellent quality, its flexibility and adaptation to the plant achieve the firm coupling which provides successful graft development. Due to its transparency, this clip allows the perfect vision of the grafted location. We offer a wide range of sizes in order to adapt it to all possible stem diameters.

Special for cucumber and tomato.

ADVANTAGES:

- ✓ Available in all diameters **from 1,2 to 3 mm**
- ✓ **Special material** for the accurate clip's attachment, non-slip and resistant to high temperature
- ✓ **Smooth surface** to avoid plant's damages and allows easy and comfortable grip
- ✓ Possibility of manufacturing in **various colours** for the distinction among varieties and the clip size's better visualization
